Section 2. **Procedure for Submissions of Plans and Specifications**. Two (2) copies of plans, for which receipt must be acknowledged in writing, will be submitted to the Review Committee electronically. Approval or disapproval of those plans will be made in writing within thirty (30) days after the receipt of those plans. Approval shall not be arbitrarily withheld or delayed, it being the intention of the Review Committee to grant or withhold the approval for the purpose of establishing a quality, restricted residential district, free from objectionable or value-destroying features and in conformity with the governing zoning codes, building codes, and other applicable regulations then in force. In the interests of fairness and promoting the best use of land, the Review Committee may, in its discretion and by an affirmative vote of at least three (3) of the five (5) members, approve plans that do not strictly conform with the requirements herein, so long as the plans substantially conform with said requirements and do not defeat the underlying purpose of establishing a quality, restricted residential district, free from objectionable or value-destroying features and in conformity with the

governing zoning codes, building codes, and other applicable regulations then in force.

A Review Committee decision to approve or disapprove submitted plans may be overturned by a petition signed by not less than eighty (80%) percent of the Improved Lot Owners and submitted to both the Review Committee and the Lot Owner who submitted the plans within seven (7) days after the Review Committee releases its written decision. Accordingly, each written decision of the Review Committee must notify the recipients that the Review Committee's decision does not become final until the 7-day petition period has lapsed without objection from at least eighty (80%) percent of Improved Lot Owners.

Section 3. **Construction Time and Requirements.** Construction of all primary structures shall be substantially completed within eighteen (18) months after issuance of any building permit for the structure. The Lot will be considered unbuildable if any of the footprint of the structure is under the 918.5 ft elevation and without an updated LOMAR, resulting in the owner NOT able to be issued a building permit to begin construction. If construction does not begin within the three-year period defined above, the OCC will have an option to purchase the Lot from the owner at a price equal to 75% of the of the original purchase price paid to the OCC. If the original owner resells the Lot to any third partner, the three-year building requirement will remain in place based on the original purchase date of the property.

Section 4. **Architectural Control.** No building, fence, wall, landscape feature, pool, hot tub, deck, patio, play structure, driveway, sidewalk, or any other structure shall be commenced, erected, or maintained on the Lots, nor shall any exterior addition to or change or alteration thereto be made to any buildings on the Lots until the plans and specifications for the same have been submitted to and approved in writing by the Review Committee.

After construction is complete on all Lots under the oversight of this declaration, Architectural Control will be limited to review and approval, including building permit approval, of any new building addition, fence, privacy screen, pergola, deck, pool and pool enclosure.

Architectural Control will be required for privacy screens, any improvements to yards, hardscape, landscape features or planting additions located 50 feet or more from the rear of the primary structure; however a building permit will not be required.
